Subject: LD 401

Dear Senator Carson, Representative Tucker and Members of the ENR Committee:

I write in support of LD 401, " An Act To Preserve State Landfill Capacity and Promote Recycling". I am a registered nurse, with concerns for the health of citizens downstream. Accountable management of waste materials, and water leachate is common sense, if not imperative, for protecting the citizens of Maine. The Penobscot River is precious, and its health is reflected in the health and well being of its citizens. Although I have been in Maine (and camped many times on the Penobscot River), for 30 years, I am originally from the Jersey shore area (via southern Pennsylvania).

I have seen the economic impact of shady back room deals that polluted the shores, and the consequent costly

clean up efforts to maintain it as a tourist destination.

Prevention would be much better NOW, than costly catchup cleanup LATER. I want my tax dollars to support prevention and health, not clean up.

Please support the passage of LD 401.

Thank you,
Eileen Wolper
