LD1679

Maine needs this bill to assist the State in mitigating, preparing for, and adapting to climate change. It provides that:

- 1) by 1/1/2030, 80% of electricity consumed in the state must come from renewable resources, and by 1/1/2050s, 100% of electricity consumed in the State must come from renewable resources;
- 2) It updates the greenhouse gas emissions reduction required in statute; and
- 3) It requires that the State Climate Action Plan be updated by 12/1/2020 and every 4 years thereafter.
