An Act To Support the Fidelity and Sustainability of Assertive Community Treatment

(EMERGENCY)

Received by the Clerk of the House on February 22, 2021. Referred to the Committee on Health and Human Services pursuant to Joint Rule 308.2 and ordered printed pursuant to Joint Rule 401.

Presented by Representative MADIGAN of Waterville.
Emergency preamble. Whereas, acts and resolves of the Legislature do not become effective until 90 days after adjournment unless enacted as emergencies; and

Whereas, this legislation needs to take effect before the expiration of the 90-day period because MaineCare reimbursement rates for providing individualized intensive integrated mental health services, known as "assertive community treatment," have not been adjusted in many years and are insufficient to enable some providers to continue to provide services; and

Whereas, the parameters and requirements for individualized intensive integrated mental health services must be reformed immediately in order to sustain the availability and effectiveness of these services by providing resources and criteria that support the fidelity of the assertive community treatment model; and

Whereas, in the judgment of the Legislature, these facts create an emergency within the meaning of the Constitution of Maine and require the following legislation as immediately necessary for the preservation of the public peace, health and safety; now, therefore,

Be it enacted by the People of the State of Maine as follows:

Sec. 1. 34-B MRSA §3801, sub-§4-C is enacted to read:

4-C. Medical assistant. "Medical assistant" means a person to whom certain activities relating to medical care and treatment have been delegated by a licensed physician or surgeon in compliance with Title 32, section 2594-A or 3270-A.

Sec. 2. 34-B MRSA §3801, sub-§7-C is enacted to read:

7-C. Psychiatric provider. "Psychiatric provider" means a licensed health care provider with psychiatric training or experience, including without limitation a psychiatrist, psychiatric nurse practitioner or physician assistant.

Sec. 3. 34-B MRSA §3801, sub-§11, as amended by PL 2017, c. 407, Pt. A, §159, is further amended to read:

11. Assertive community treatment. "Assertive community treatment" or "ACT" means a self-contained, evidence-based service with a fixed point of responsibility for providing treatment, rehabilitation and support services to persons with mental illness for whom other community-based treatment approaches have been unsuccessful. Assertive community treatment uses clinical and rehabilitative staff to address symptom stability; relapse prevention; maintenance of safe, affordable housing in normative settings that promote well-being; establishment of natural support networks to combat isolation and withdrawal; the minimizing of involvement with the criminal justice system; individual recovery education; and services to enable the person to function at a work site. Assertive community treatment is provided by multidisciplinary teams who are on duty 24 hours per day, 7 days per week; teams must include a psychiatrist, psychiatric provider, registered nurse, certified rehabilitation counselor or certified employment specialist, a peer recovery specialist and a substance use disorder counselor and may include an occupational therapist, community-based mental health rehabilitation technician, psychologist, licensed clinical social worker or a person with training demonstrated by a 4-year postsecondary or graduate degree in a mental health related field. An ACT team member who is a state employee is, while in good faith
performing a function as a member of an ACT team, performing a discretionary function
within the meaning of Title 14, section 8104-B, subsection 3.

Sec. 4. Reimbursement rate increase. The Department of Health and Human
Services shall increase reimbursement rates under rule Chapter 101: MaineCare Benefits
Manual, Chapters II and III, Section 17 for assertive community treatment by 25%
beginning on the effective date of this Act.

Sec. 5. Rulemaking. The Department of Health and Human Services shall amend
its rules governing the assertive community treatment, or ACT, program within 6 months
after the effective date of this Act, with appropriate stakeholder involvement, to make the
following changes to the program:

1. Provide for a per member, per month reimbursement model that ensures adequate
resources to provide services achieving fidelity to the evidence-based model for ACT
services, using a per member, per month payment model;

2. Ensure that limits are not placed on the duration of ACT services to any recipient
and that ACT services remain the point of contact for all clients meeting the eligibility
requirements for ACT as long as necessary;

3. Provide an initial authorization period of one year for clients meeting eligibility
requirements for ACT and require reauthorization no more often than annually thereafter;

4. Allow billing for services under the program for coordination of care during an
initial engagement period of 90 days, when the recipient of those services is temporarily
admitted to a hospital or resident in a jail or prison in this State and when the recipient is
making a transition to a lower level of care, recognizing that the fidelity of the program to
the ACT model requires continuity of treatment;

5. Clarify that the minimum contact requirement is 3 contacts weekly on average over
each year of authorized service and that a contact may be face to face, through a closed
door or an outreach attempt at the home or in the community, including without limitation
street outreach; and

6. Ensure that medical eligibility to receive services under the program reflects an
evidence-based understanding of the diagnoses and circumstances in which ACT is
effective.

Rules adopted pursuant to this section are routine technical rules as defined in the
Maine Revised Statutes, Title 5, chapter 375, subchapter 2-A.

Emergency clause. In view of the emergency cited in the preamble, this legislation
takes effect when approved.

SUMMARY

This bill modifies the definition of "assertive community treatment" to better align the
definition with an evidence-based treatment model. The bill adds definitions of
"psychiatric provider" and "medical assistant" and changes the description of the
composition of the multidisciplinary teams that provide assertive community treatment.
The bill also requires the Department of Health and Human Services to increase the
MaineCare reimbursement rates for assertive community treatment by 25% immediately to
allow providers to continue to offer the service. The bill also requires the department to
adopt rules to transition to a per member, per month payment model and to reform the
criteria and operation of the program to ensure its fidelity to the evidence-based model for
assertive community treatment services.
