

I am against the bill: An Act To Start a Spring Bear Hunting Season

I think this is an incredibly cruel piece of hunting legislation. Maine already allows the barbaric practices of baiting bears with junk food, using traps, and hunting with dogs. Now LD 337 would allow more hunting at a time when bears are raising their new born young, who, like all small creatures of any species, need to be fed, protected, and, in general cared for. Killing adult bears, especially females, will result in more orphans, left to fend for themselves and most likely perish in a harsh environment.

Please do not pass this bill.
