Subject: oppose LD 337

Thank you for taking your time to read my opinion. Almost half of Maine citizens are opposed to Maine's current hunting practices. The consideration of a spring hunt is shocking. If the bear population is growing it is, in part, due to the baiting practice. This sickens me. It's like luring a child with candy and then murdering the child. The ethics of many hunters is poor, without caring about the killing a mother bear. Then, essentially killing the family. Please stop this plan before it goes any further. I am ashamed of Maine's current hunting practices and it is disheartening to even learn about this proposal.

Thank you,
Susan G Beckwith
