Senator Dill, Representative Hickman and members of the Agriculture, Conservation and Forestry Committee;

We are residents of Belfast, Maine, writing in support of the following bills that will address important risks to watersheds and water resources potentially affected by water withdrawals and combined effects of aquaculture industries: LD 620/HP 0448 “An Act Regarding the Licensing of Land-Based Aquaculture Facilities” and LD 199/HP0162 “An Act to Create a Water Resources Planning Committee”

Thank you for your consideration.
