Please pass/support: LD 1287, LD 1320 and LD1336  
to protect the Penobscot River and Bay from Mercury contamination. This area must be cleaned and protected  
by the EPA for the health of the affected communities in this area.

WATER IS LIFE and we must protect our waters to survive the destruction caused by companies that have no  
regard for local citizens' health and well-being.

Please support water protections for all our sakes.

Thank you for your consideration and support  
Patsy Shankle
