## Introduction

The Revenue Forecasting Committee (RFC) met on February 27, 2018 to review and update the current revenue forecast to comply with its “spring” even-numbered year statutory reporting date of March 1<sup>st</sup>. The RFC revised its revenue projections through the fiscal year ending June 30, 2021 for the General Fund, Highway Fund, Fund for a Healthy Maine and Medicaid/MaineCare Dedicated Revenue Taxes.

## Economic Forecast

This update of the revenue forecast included a review of the economic forecast statutorily due by February 1<sup>st</sup>. The economic forecast was developed by the Consensus Economic Forecasting Commission (CEFC) at its meeting on January 26, 2018. At this meeting the CEFC also designated two alternative scenarios to meet the new statutory requirement to provide the State Economist, the State Budget Officer, and the Associate Commissioner for Tax Policy with at least two alternative economic recession scenarios of varying levels of severity.

Both the national and state economies appear to have had a good year in 2017. There are limited new data points available since the CEFC last met in October 2017, but additional data on the performance of the economy last year indicates that GDP and personal income both grew. However, oil and gasoline prices have been trending upward recently as well.

The Commission made modest changes to the existing forecast for employment and more substantial revisions to the forecast for personal income, while leaving forecasts for inflation and corporate profits largely untouched. Many of the revisions to personal income components were based on anticipated results from the Tax Cuts and Jobs Act (TCJA). While there has been more positive data on in-migration recently, the Commission remains concerned about the demographic situation in Maine and the resulting impacts on workforce availability.

The forecast for wage and salary employment growth was left unchanged for 2017, 2020, and 2021 and revised upward for 2018 and 2019 based on data showing stronger than expected recent in-migration and employment growth. The new forecast reaches 627,100 in 2019 and remains at that level for 2020-2023. CPI was revised slightly downward for 2017, from 2.4 percent to 2.1 percent, with the release of actual 2017 data from the U.S. Bureau of Labor Statistics, while the remaining years through 2021 were left unchanged and both 2022 and 2023 were forecast at 2.2 percent. Total personal income was revised upward by 0.4 percentage points in 2017 based on information from Maine Revenue Services and Maine Department of Labor regarding wage growth through the year. The forecasts for 2018, 2019, and 2020 were revised upward by 1.3, 0.8, and 0.1 percentage points, respectively, largely due to influences of the TCJA. 2021 was revised downward by 0.1 percentage point. Both 2022 and 2023 were forecast at 3.1 percent. Wage and salary income growth for 2017 was revised upward by 1.0 percentage points due to preliminary data from Maine Revenue Services and Maine Department of Labor. The forecasts for 2018 and 2019 were revised upward by 1.4 and 0.2 percentage points, respectively, due to the reasons outlined above. The forecast for 2020 was left unchanged and the forecast for 2021 was revised downward by 0.2 percentage points. Both 2022 and 2023 were forecast at 3.0 percent.

A copy of the February 2018 report of the CEFC and other economic information providing the basis for this revenue forecast is included in Appendix E.

## Summary of Revenue Forecast

The economic variables in the CEFC forecast play an important role in the revenue forecast. Maine Revenue Services' Office of Tax Policy (MRS/OTP) tax models use the CEFC economic variables to help project revenue from the major taxes. Data related to non-tax revenue lines were provided by a number of different state agencies and reviewed by staff in the Office of Fiscal and Program Review and the Bureau of the Budget to come up with consensus recommendations. The RFC reviewed MRS/OTP and other staff recommendations at its meeting on February 27<sup>th</sup> and agreed to those recommendations. The following tables and narratives highlight the final changes to each of the major funds and revenue sources accepted by the RFC as part of its March 2018 update to the revenue forecast. More detail on each of the funds and revenue sources is provided in the various appendices.

### General Fund Summary

	<b>FY17 Actual</b>	<b>FY18</b>	<b>FY19</b>	<b>FY20</b>	<b>FY21</b>
Current Forecast	\$3,454,903,862	\$3,466,747,924	\$3,599,558,610	\$3,616,121,897	\$3,746,978,887
Annual % Growth	2.6%	0.3%	3.8%	0.5%	3.6%
Net Increase (Decrease)	\$0	\$38,872,505	\$89,607,394	\$79,195,598	\$70,513,527
Revised Forecast	\$3,454,903,862	\$3,505,620,429	\$3,689,166,004	\$3,695,317,495	\$3,817,492,414
Annual % Growth	2.6%	1.5%	5.2%	0.2%	3.3%

General Fund revenue estimates were revised upward by \$38.9 million for FY18 and by \$89.6 million for FY19 (upward by \$128.5 million for the 2018-2019 biennium). The revised forecast increases the overall rate of growth for General Fund revenue for FY18 from 0.3% to 1.5% and for FY19 from 3.8% to 5.2%. The estimates for the 2020-2021 biennium were revised upward by \$149.7 million. It is important to note FY20 reflects a smaller overall growth rate of 0.2%, largely as a result of Municipal Revenue Sharing returning to the 5% level under current law from the 2% level in place for FY16 through FY19. The growth rate for FY21 is projected to be 3.3%.

The sales and use tax line is \$4.8 million over budget through the first six months of FY18. Applying the relevant economic variables from the new CEFC forecast resulted in the sales and use tax model forecasting additional revenue for the FY18-FY21 budget period. The net impact of these adjustments results in an increase in sales and use tax revenue of \$4.5 million in FY18, \$13.0 million in FY19, \$17.0 million in FY20, and \$13.5 million in FY21. The forecast of sales and use tax continues to assume that automobile unit sales will be flat to slightly declining over the forecast period, but the average price of new auto sales will increase by approximately 3 percent a year. The new sales tax forecast assumes moderate growth of 4 percent a year between FY19 and FY21.

The RFC has increased its forecast of individual income tax receipts by \$31.3 million in FY18, by \$77.2 million in FY19, and by \$121.5 million in the 2020-2021 biennium. The bulk of the forecast changes are the result of the more optimistic economic forecast from the CEFC. Approximately \$50 million of the annual increase in fiscal years 2019-21 is because of the significant increase in projected wage and salary growth in calendar years 2018 and 2019. FY19 also includes one-time revenue from additional capital gains and dividend income associated with the repatriation of earnings incentivized by the federal tax reform act.

The individual income tax forecast continues to be complicated by the enactment and subsequent repeal of the 3 percent surtax, and the enactment of the federal TCJA last December. The surtax was in place for over 6 months of tax year 2017. It's still unclear how much in additional withholding and estimated

payments associated with the surtax was collected during the period it was in effect. When the committee met in November the hope was the final estimated payment for 2017 would provide information that could help inform the committee on the surtax's impact on FY17 and FY18 receipts. With passage of the TCJA, taxpayers had a strong incentive to accelerate tax year 2017 state tax payments into December to avoid the state and local tax deduction limitation that became effective on January 1, 2018. MRS, like most income tax states, saw a dramatic increase in estimated payments during the last week of December and the first week of January; a 102 percent increase over the same period a year ago. The Office of Tax Policy estimates that between \$18 million and \$32 million of revenue was likely shifted from April to the December/January time period. Accounting for this taxpayer behavior explains why the individual income tax surplus of \$58 million through January is expected to narrow to \$31.3 million at fiscal year's end.

Other notable adjustments to General Fund revenue lines include:

- **Business Equipment Tax Exemption (“BETE”) program.** The forecast for revenue transferred for FY 18 was decreased (positive impact on the General Fund) by \$1 million to reflect actual program experience for the current year.
- **Transfer from Lottery Commission.** The forecast for revenue from the transfer from the Lottery Commission was increased by 4.1 million for FY18 and by \$2.1 million per year for FY19 through FY21 based on increased lottery sales and profits.
- **Other Taxes and Fees - Liquor Taxes and Fees.** The forecast was updated to include \$2.9 million in each year of the forecast period from liquor premium taxes on spirits. This revenue source had been inadvertently omitted from previous forecasts.
- **Other Taxes and Fees - Finance Industry Fees.** The forecast for revenue from securities fees was increased by \$1.0 million for each year of the forecast period based on historical and current year performance.
- **Other Taxes and Fees - Milk Handling Fee/Transfer to Maine Milk Pool.** The forecast for revenue from the milk handling fee was adjusted upward by \$0.7 million for FY18 and by \$2.0 million per year for FY19 through FY21. The forecast for transfers to the milk pool was adjusted upward (negative impact on General Fund) by \$3.5 million for FY18, by \$4.7 million for FY19 and by \$3.5 million per year for FY20 and FY21. These increased transfers are forecast based on the latest estimates of milk prices, specifically overproduction in international and domestic markets putting downward pressure on prices.
- **Other Revenue. Unclaimed Property Transfer.** The forecast for transfers from the Unclaimed Property program was adjusted downward (negative impact on General Fund) by \$1.3 million for each year of the forecast period as a result of increased payouts from the program.

### Highway Fund Summary

	FY17 Actual	FY18	FY19	FY20	FY21
Current Forecast	\$334,318,123	\$327,129,488	\$333,428,035	\$337,994,682	\$339,998,805
Annual % Growth	2.1%	-2.2%	1.9%	1.4%	0.6%
Net Increase (Decrease)	\$0	\$1,550,673	\$397,988	\$403,590	\$405,129
Revised Forecast	\$334,318,123	\$328,680,161	\$333,826,023	\$338,398,272	\$340,403,934
Annual % Growth	2.1%	-1.7%	1.6%	1.4%	0.6%

**Highway Fund** revenue estimates were revised upward by \$1.6 million for FY18 and by \$0.4 million for FY19 (upward by \$1.9 million over the 2018-2019 biennium). The estimates for the 2020-2021 biennium were revised upward by \$0.8 million. The forecast for long-term trailer registration fee revenue was increased by \$1.0 million for FY18, while the forecast for motor vehicle title fee revenue was increased by \$0.3 million for each year of the forecast period.

### Fund for a Healthy Maine Summary

	FY17 Actual	FY18	FY19	FY20	FY21
Current Forecast	\$55,228,128	\$50,645,993	\$50,158,504	\$50,154,238	\$50,198,781
Annual % Growth	-1.1%	-8.3%	-1.0%	0.0%	0.1%
Net Increase (Decrease)	\$0	(\$135,724)	(\$258,215)	(\$261,074)	(\$263,693)
Revised Forecast	\$55,228,128	\$50,510,269	\$49,900,289	\$49,893,164	\$49,935,088
Annual % Growth	-1.1%	-8.5%	-1.2%	0.0%	0.1%

**Fund for a Healthy Maine** revenue estimates were revised downward by \$0.4 million for the 2018-2019 biennium and by \$0.5 million for the 2020-2021 biennium. These changes largely reflect changes in estimates for the casino revenue credited to the Fund. After the positive changes made in the December forecast of Tobacco Settlement Payments, largely the result of updated national estimates, the committee felt no additional changes were appropriate until it could review this year's annual April payment.

### Medicaid/MaineCare Dedicated Revenue Taxes Summary

	FY17 Actual	FY18	FY19	FY20	FY21
Current Forecast	\$176,841,205	\$188,855,172	\$186,974,016	\$186,974,016	\$186,974,016
Annual % Growth	1.3%	6.8%	-1.0%	0.0%	0.0%
Net Increase (Decrease)	\$0	(\$4,368,553)	\$584,220	\$584,220	\$584,220
Revised Forecast	\$176,841,205	\$184,486,619	\$187,558,236	\$187,558,236	\$187,558,236
Annual % Growth	1.3%	4.3%	1.7%	0.0%	0.0%

**Medicaid/MaineCare Dedicated** revenue estimates were revised downward by \$4.4 million for FY18 and upward by \$0.6 million for FY19 (downward by \$3.8 million for the 2018-2019 biennium). The estimates for the 2020-2021 biennium were revised upward by \$1.2 million. Of the FY18 total reduction of \$4.4 million, \$2.5 million resulted from a one-time reduction in nursing facility tax collections and \$1.9 million from a one-time reduction in service provider tax collections.

## Conclusion

Actual tax receipts through late February, indications of an accelerating economy spurred by stimulus from the federal tax reform act, and a more optimistic economic forecast from CEFC have provided the RFC with enough confidence to increase the General Fund revenue forecast for the 2018-2019 biennium by \$128.5 million. The committee believes it has struck the right balance between recognizing the strength in revenue growth over the course of FY18 and concern that some of this revenue has been shifted from the April income tax filing season to earlier in the fiscal year because of taxpayer behavior in response to the TCJA.

While the annual adjustments to this forecast are certainly more than recent forecasts, it is important to remember that with the exception of FY19, the annual increases represent only 1 to 2 percent of General Fund revenues. Also, the annual growth in General Fund revenue is projected to remain relatively tepid. The new forecast calls for 1.5% revenue growth in FY18, 5.2% growth in FY19, 0.2% growth in FY20 and 3.3% growth in FY21. Adjusting for one-time revenue in FY19 from additional capital gains and dividend income associated with repatriated earnings by multinational corporations, and the return of revenue sharing to 5 percent of income and sales taxes in FY20, would result in revenue growth in those two years being a modest 3 to 4 percent. Revenue growth in this range is certainly achievable given the February CEFC forecast for the national and Maine economies.

\* Casino Revenue reflects that portion of the State's share of proceeds from slot machines at the Hollywood Casino in Bangor designated for the Fund for a Healthy Maine. For fiscal years 2009-10, 2010-11, and 2011-12, PL 2009, c. 462, Pt. H. capped the proceeds transferred to the Fund for a Healthy Maine at \$4.5 million per year, with the balance transferred to the General Fund. PL 2011 c. 380, Part II extended the \$4.5 million cap through 2012-13. PL 2011 c. 477 re-directed \$2 million of the 2012-13 transfer to the General Fund and PL 2011, c. 657 re-directed the remaining \$2.5 million of the 2012-13 transfer to the General Fund.

## Summary

The Maine Consensus Economic Forecasting Commission (CEFC) convened on January 26, 2018, to review and revise the forecast through 2021 and to additionally forecast through 2023. Two additional recession scenarios of varying severity were identified to meet the Commission's new statutory requirement. This report provides a summary of the Commission's findings.

Both the national and state economies appear to have had a good year in 2017. There are limited new data points available since the CEFC last met in October 2017, but additional data on the performance of the economy last year indicates that GDP and personal income both grew. However, oil and gasoline prices have been trending upward recently as well.

The Commission made modest changes to the existing forecast for employment and more substantial revisions to the forecast for personal income, while leaving forecasts for inflation and corporate profits largely untouched. Many of the revisions to personal income components were based on anticipated results from the Tax Cuts and Jobs Act. While there has been more positive data on in-migration recently, the Commission remains concerned about the demographic situation in Maine and the resulting impacts on workforce availability.

The forecast for wage and salary employment growth was left unchanged for 2017, 2020, and 2021 and revised upward for 2018 and 2019 based on data showing stronger than expected recent in-migration and employment growth. The new forecast reaches 627,100 in 2019 and remains at that level for 2020-2023. CPI was revised slightly downward for 2017, from 2.4 percent to 2.1 percent, with the release of actual 2017 data from the U.S. Bureau of Labor Statistics, while the remaining years through 2021 were left unchanged and both 2022 and 2023 were forecast at 2.2 percent. Total personal income was revised upward by 0.4 percentage points in 2017 based on information from Maine Revenue Services and Maine Department of Labor regarding wage growth through the year. The forecasts for 2018, 2019, and 2020 were revised upward by 1.3, 0.8, and 0.1 percentage points, respectively, largely due to influences of the Tax Cuts and Jobs Act. 2021 was revised downward by 0.1 percentage point. Both 2022 and 2023 were forecast at 3.1 percent. Wage and salary income growth for 2017 was revised upward by 1.0 percentage points due to preliminary data from Maine Revenue Services and Maine Department of Labor. The forecasts for 2018 and 2019 were revised upward by 1.4 and 0.2 percentage points, respectively, due to the reasons outlined above. The forecast for 2020 was left unchanged and the forecast for 2021 was revised downward by 0.2 percentage points. Both 2022 and 2023 were forecast at 3.0 percent.

The table below provides the forecast's major indicators.

Calendar Years	2016	2017	2018	2019	2020	2021	2022	2023
<b>Wage &amp; Salary Employment (Annual Percentage Change)</b>

CEFC Forecast 11/2017	3.2	3.0	2.9	3.7	3.7	3.7		
CEFC Forecast 02/2018	3.2	4.0	4.3	3.9	3.7	3.5	3.0	3.0
<b>CPI (Annual Percentage Change)</b>								
CEFC Forecast 11/2017	1.3	2.4	2.5	2.3	2.5	2.4		
CEFC Forecast 02/2018	1.3	2.1	2.5	2.3	2.5	2.4	2.2	2.2

In deliberations leading to consensus, the CEFC considered information presented by several state agencies, including the Maine Department of Labor, Maine Revenue Services, and by the Maine State Economist at the Department of Administrative and Financial Services (DAFS). The following sections summarize these reports.

### **Maine State Economist (Department of Administrative and Financial Services)**

Maine's real GDP grew 0.5% in the second quarter of 2017. Personal income in Maine grew 2.0% from the first three quarters of 2016 to the first three quarters of 2017, while wage and salary income, which is the largest component of total personal income, grew 1.8% over the same period. The debt-to-income level for Maine businesses and households continued to rise to new levels in the third quarter of 2017. The Consumer Price Index was up 2.1% in December 2017 from a year ago, boosted by recent increases in energy prices.

Nationwide, consumer sentiment has remained relatively stable in recent months. The December 2017 level was down 2.3% from a year ago and down 2.6% from November 2017. Small business optimism has also been fairly stable in recent months, down 2.4% from the previous month in December 2017 and down 0.9% year over year.

The price of crude oil has continued increasing recently with prices in the fourth quarter of 2017 up 17%. As a result, heating oil prices and gasoline prices have been higher as well. Heating oil is around \$2.96 per gallon while gasoline is currently averaging \$2.67 per gallon.

Existing single-family home sales in Maine were up 11.5% in November 2017 compared to the same month last year and housing permits for the December 2016 – November 2017 year were 9.4% higher than the previous 12-month period. The median home price in the Portland-South Portland Metropolitan Statistical Area (which encompasses all of York, Cumberland, and Sagadahoc counties) increased 6.0% year-over-year in the third quarter of 2017. Mortgage delinquency rates in Maine have been declining but remain higher than the national rate. The foreclosure rate in Maine was 0.38% in the third quarter of 2017.

Full background materials are available at:

<http://www.maine.gov/economist/state/forecast.html>

## **Maine Department of Labor**

Labor market conditions in Maine are very tight. December's 3.0% unemployment rate estimate was historically low, at or below 4.0% for the 27<sup>th</sup> consecutive month, the second longest such stretch on record. All six measures of labor underutilization for Maine reached series lows in 2017. Labor market tightness appears to be the reason the rate of job growth has slowed over the last two years.

Total wages paid (not inflation adjusted) were up 3.8% in the first three quarters of 2017 compared to the same period a year earlier. If the fourth quarter rise is similar to previous years, the total may reach \$26.7 billion for the year. Adjusted for inflation, the average wage per job continues to rise at the fastest rate in nearly two decades.

The minimum wage increased to \$10 per hour on January 1. The number of workers earning less than \$10 per hour has declined sharply since 2013. In 2016 there were an average of 59,000 workers who earned less than \$10 per hour in their primary job. Data for 2017 is not yet available. We estimate there were 52,000 workers who earned less than \$10 per hour who received an increase in their hourly rate of pay at the beginning of the year.

The natural change in the population (births minus deaths) remains negative, a trend we expect to continue for some time. There will be record numbers of retirements over the next 15 years – the point at which more people will retire than enter the workforce is getting closer. More positively, net-migration to the state has been on the upswing, likely driven by higher wages and stepped-up efforts by companies and business associations to recruit working-age people to the state.

The Center for Workforce Research is currently developing a 10 year workforce forecast for the period from 2016 to 2026. The job growth outlook depends on changes in the rate of labor force participation and in net-migration among those age cohorts that are most attached to the labor market. We expect rising labor force participation in nearly all age groups, but declining total participation rates as a rising share of the population reaches retirement. There are a number of plausible scenarios on participation and migration. In the ones that seem most plausible, employment rises modestly over the next few years, followed by a period of little change.

The presentation is available at

[www.maine.gov/labor/cwri/publications/pdf/CEFC%20January%202018.pdf](http://www.maine.gov/labor/cwri/publications/pdf/CEFC%20January%202018.pdf).

## **Maine Revenue Services - Office of Tax Policy**

December General Fund revenues were over budget by \$26.9 million or 10.7 percent. For the first half of fiscal year 2018, General Fund revenues are \$39.6 million over budget (+2.3 percent). Compared to the same six-month period of last fiscal year, fiscal year 2018 General Fund revenues are up by 3.2 percent (+\$55.7 million).

November taxable sales (December revenue) increased 8.3 percent over last year. For the month, sales and use and service provider taxes, combined, were \$4.9 million over budget. It appears that the robust taxable sales growth in November was aided by sales related to the wind storm at the end of October. Building supply sales increased by 12.4 percent, year-over-year, and lodging sales increased by 24 percent. Lodging sales were up across many parts of the state, and there is no other explanation for November sales growth of that magnitude. Many automobiles were severely damaged in the storm and may have helped push sales up by 7.2 percent. Areas traditionally associated with holiday shopping,

such as general merchandise and other retail sales, were up 14.4 and 4.8 percent, respectively. Restaurant sales also were solid in November, increasing by 7.1 percent compared to a year ago. Overall year-over-year consumer sales growth of 8.8 percent in November, even after adjusting for the effects of the wind storm, was strong and indicative of a good start to the holiday shopping season.

Individual income tax revenues were over budget in December by \$21.4 million. Estimated payments were the major source of the monthly positive variance, over budget by \$16.6 million; a 50 percent increase over last December's payments. The final estimated payment is not due until January 15, 2018, but many taxpayers pre-pay their state estimated payment in December to get the itemized deduction on their federal tax return. The limitation on the state and local tax (SALT) deduction included in the federal Tax Cuts and Jobs Act resulted in many taxpayers expecting to be subject to that limitation deciding to shift payments into December. Estimated payments postmarked by December 31, 2017, and received during the first week of January were up over 200 percent compared to the same period a year ago. It is unclear how much of these payments are based on stronger than projected 2017 taxable income versus a timing in payments that will reduce budgeted final payments in April. Withholding payments accounted for most of the remaining monthly surplus, coming in \$4 million over budget.

### **Macroeconomic Assumptions**

Two different baseline economic forecasts were examined at the meeting: the Moody's Analytics baseline scenario for January 2018 and the IHS Economics baseline scenario for January 2018. Additionally, DAFS provided an alternative scenario based on demographic assumptions that limit employment growth. Each forecast was based on a different set of national macroeconomic assumptions. The DAFS scenario was based on the Moody's Analytics baseline scenario with industry sector employment growth adjustments by the State Economist. These three forecasts were then compared to the CEFC's November 2017 forecast. The key assumptions made by the CEFC are below.

- Maine population growth is likely to limit employment growth in the coming years, particularly as the baby boom generation continues to move into retirement age. The employment forecast adopted by the CEFC assumes that Maine has seen stronger in-migration recently and this will continue for at least the next few years. Additionally, tightening in the labor market will put upward pressure on wages.
- The federal Tax Cuts and Jobs Act will result in increased growth in personal income and corporate profits in 2018 and 2019 before tapering off.

### **Consensus Forecast**

IHS now has employment peaking in 2020 before beginning a slight decline. Maine has seen robust employment growth in 2017, although not as strong as 2016, and will likely see some growth for the next couple of years before demographic forces create too much of an opposing headwind.

Employment growth rates were left unchanged for 2017, 2020, and 2021, while 2019 and 2020 were revised upward slightly. Employment reaches a peak level of 627,100 in 2019 and stays at that level throughout the rest of the forecast period.

Revisions to wage and salary income growth were driven by two primary factors: preliminary reports from Maine Revenue Services and Maine Department of Labor showing 2017 year to date wage growth

that has been much stronger than the figures reported by the Bureau of Economic Analysis as well as effects from the Tax Cuts and Jobs Act. Wage and salary income growth for 2017, 2018, and 2019 were revised upward by 1.0, 1.4, and 0.2 percentage points, respectively. The forecast for 2020 was left unchanged while the forecast for 2021 was revised downward by 0.2 percentage points. Both 2022 and 2023 were forecast at 3.0 percent growth.

The forecast for supplements to wages and salaries was revised upward by 0.9 percentage points in 2018, while all other years were left unchanged. 2022 was forecast at 2.9 percent and 2023 was forecast at 3.1 percent growth. The growth rate for nonfarm proprietors' income was revised upward by 0.8 percentage points in 2018 and downward by 0.3 percentage points in 2021, while the remaining years were left unchanged. 2022 and 2023 were both forecast at 2.5 percent growth. The forecast for dividends, interest, and rent was left unchanged for 2017 with all remaining years revised upward: 2018 by 2.5 percentage points, 2019 by 2.7 percentage points, 2020 by 1.0 percentage points, and 2021 by 0.2 percentage points. 2022 was forecast at 2.3 percent growth and 2023 was forecast at 2.2 percent. The forecast for personal current transfer receipts was left unchanged for all years. 2022 and 2023 were both forecast at 4.5 percent growth.

The overall result for total personal income was a 0.4 percentage point revision upward for 2017, a 1.3 percentage point revision upward for 2018, a 0.8 percentage point revision upward for 2019, a 0.1 percentage point revision upward for 2020, and a 0.1 percentage point revision downward for 2021. Both 2022 and 2023 were forecast at 3.1 percent growth.

The U.S. Bureau of Labor Statistics released 2017 growth in the Consumer Price Index resulting in a downward revision of 0.3 percentage points in that year. The CEFC left the remaining years unchanged from the previous forecast and forecast both 2022 and 2023 at 2.2 percent.

The forecast for corporate profits was left unchanged for all years, as the previous forecast already reflected the possibility of corporate tax cuts that were subsequently passed in the Tax Cuts and Jobs Act and there is too little additional information available at this time to warrant changes in the forecast. 2022 was forecast at 3.7 percent growth and 2023 was forecast at 2.7 percent growth.

Overall, the primary source of concern for the CEFC continues to be Maine's demographic situation, with an aging population and limited population growth, although there has been a recent increase in immigration. There were significant increases to many lines of the forecast in 2018 and 2019 following the passage of the Tax Cuts and Jobs Act.

The following page provides the full forecast.

\*\*\*Farm Proprietors' income was negative in 2015 - 2017

## Alternative Economic Scenarios

### Statute and Background: 5 M.R.S.A. §1710-A

*4. Alternative economic scenarios. No later than February 1st of each even-numbered year the commission shall provide to the State Budget Officer, the State Economist and the Associate Commissioner for Tax Policy at least 2 additional economic forecasts that assume potential economic recession scenarios of varying levels of severity. These additional forecasts must include economic assumptions for the current fiscal biennium and the next 2 fiscal biennia. In each report the commission shall fully describe the methodology employed in reaching its recommendations.*

The Governor's biennial budget included a proposal that was subsequently enacted in Public Laws of Maine 2017, chapter 284, requiring the CEFC to provide the State Economist, the State Budget Officer, and the Associate Commissioner for Tax Policy with at least two alternative economic recession scenarios of varying levels of severity. The alternative scenarios are required to be included in the CEFC's report due February 1<sup>st</sup> of each even-numbered year and also must include assumptions for calendar years that encompass the current and next two biennia. By October 1<sup>st</sup> of each even-numbered year the CEFC and RFC will jointly issue a report to the Governor, the Legislative Council and the joint standing committee of the Legislature having jurisdiction over appropriations and financial affairs that utilizes the alternative economic scenarios recommended by the CEFC. The report will include analyses and findings that detail the stress impact such economic recession scenarios would have on the current General Fund revenue projections of sales and income tax revenues. In addition, the report must include an analysis of the sufficiency of the current level of the Budget Stabilization Fund and an estimate of the reserves in the Budget Stabilization Fund necessary to offset the declines in revenue as a result of potential economic recession scenarios.

### Methodology

The Commission spent some time discussing how best to identify the alternative scenarios for use in the "stress test" report described in statute. The Commissioners decided to designate two alternative scenarios provided by Moody's Analytics in January 2018 as the moderate and severe recession scenarios. While the scenarios describe a particular set of specific events surrounding the recessions, the Commission does not ascribe to these specifics, instead selecting the scenarios based on the numbers and growth rates that seemed reasonable as generic "moderate" and "severe" recessions. These scenarios should provide plausible economic inputs for an analysis of the General Fund revenue projections in both a moderate and severe downturn. Brief descriptions of the economic conditions follow; forecast details will be included in the October 1, 2018, stress test report.

### Moderate recession scenario

The moderate recession scenario selected by the Commission is the "S7" Next-Cycle Recession scenario. On a macroeconomic level, this recession lasts a full year, which is comparable to the postwar average of recessions. The national unemployment rate peaks at 8 percent and real gross domestic product declines around 2 percent. Inflation rises to 4 percent. Employment in Maine declines around 2.5 percent. Wage and salary income in Maine declines around 2 percent, while total personal income continues to grow but at a slower pace.

### Severe recession scenario

The severe recession scenario selected by the Commission is the "S4" Protracted Slump scenario. On a macroeconomic level, this deep recession lasts over a year and a half. The national unemployment rate peaks near 10 percent and real gross domestic product declines around 4.5 percent. Inflation is negative in the first year of this recession. Employment in Maine declines around 5.5 percent. Wage and salary income in Maine declines around 6 percent and total personal income declines around 2.5 percent.
