

Diane Stevens  
Richmond  
LD 2129

Please pass LD 2129 into law. A family member was sexually assaulted and the kit went missing from police without any accountability. This person must live daily with the horror of what was done to them. There is little chance without the kit that justice will be served. Law enforcement needs to be held accountable and have a tracking system in which to keep these kits safe. Victims deserve better than what the system now in place offers.
