Sec. 5. 30-A MRSA §3010, first ¶, as amended by PL 2007, c. 548, §2, is further amended to read:

This section applies to every franchisee. For purposes of this section, "franchisee" means a cable system operator that is granted a franchise by a municipality in accordance with section 3008. For purposes of this section, "cable system operator" and "cable television service" have the same meanings as in section 3008, except that "cable system operator" includes a multichannel video programming distributor as defined in 47 United States Code, Section 522(13). For purposes of this section, "originator" means a local unit of government or the entity to which a local unit of government has assigned responsibility for managing public, educational and governmental access channels.

Sec. 6. 30-A MRSA §3010, sub-§§5-A, 5-B and 5-C are enacted to read:

5-A. Public, educational and governmental access channels. A cable system operator shall carry public, educational and governmental access channels on the cable system operator's basic cable or video service offerings or tiers. A cable system operator may not separate public, educational and governmental access channels numerically from other local broadcast channels carried on the cable system operator's basic cable or video service offerings or tiers and, in the event of a franchise license transfer, shall use the same channel numbers for the public, educational and governmental access channels as used for those channels by the incumbent cable system operator, unless prohibited by federal law. After the initial designation of public, educational and governmental access channel numbers, a cable system operator may not change the channel numbers without the agreement of the originator, unless the change is required by federal law.

A cable system operator shall restore a public, educational or governmental access channel that has been moved without the consent of the originator within the 24 months

preceding the effective date of this subsection to its original location and channel number within 60 days after the effective date of this subsection.

5-B. Transmission. A cable system operator shall retransmit public, educational and governmental access channel signals in the format in which they are received from the originator and at the same signal quality as that provided to all subscribers of the cable television service for local broadcast channels. A cable system operator may not diminish, down convert or otherwise tamper with the signal quality or format provided by the originator. A cable system operator shall deliver a public, educational or governmental access channel signal to the subscriber in a quality and format equivalent to the quality and format of local broadcast channel signals carried on the cable television service if provided as such by the originator. A cable system operator shall carry each public, educational or governmental access channel in both a high definition format and a standard digital format in the same manner as that in which local broadcast channels are provided, unless prohibited by federal law.

A cable system operator, when requested, shall assist in providing the originator with access to the entity that controls the cable television service's electronic program guide so that subscribers may view, select and record public, educational and governmental access channels in the same manner as that in which they view, select and record local broadcast channels. In addition, a cable system operator shall identify public, educational and governmental access channels on the electronic program guide in the same manner as that in which local broadcast channels are identified. This subsection does not obligate a cable system operator to list public, educational and governmental access channel content on channel cards and channel listings. If channels are selected by a viewer through a menu system, the cable system operator shall display the public, educational and governmental access channels' designations in a similar manner as that in which local broadcast channel designations are displayed.

A cable system operator shall make available to the originator a toll-free telephone number with a direct line to a service technician who is familiar with the signal path and equipment associated with public, educational and governmental access channels on the cable television system for resolution of a signal quality problem.

5-C. Franchise renewals. The franchise renewal process must be conducted in compliance with 47 United States Code, Section 546 and this subsection.

A. A cable system operator shall maintain adequate personnel and resources to respond to municipal requests for renewal information in a timely manner. Failure to respond in a timely manner is a violation of the Maine Unfair Trade Practices Act.

B. If an automatic renewal provision exists in a franchise agreement on the effective date of this subsection, the automatic renewal provision remains in effect until that franchise agreement expires. The cable system operator shall notify the franchising authority of the automatic renewal no later than 36 months in advance of the expiration of the franchise.

C. A municipality may require maps, diagrams, annual reports and franchise fee statements at renewal, which the cable system operator shall make available upon reasonable notice. If information is proprietary, the municipality may execute a nondisclosure agreement with the cable system operator.

Sec. 7. Automatic renewal. Notwithstanding the Maine Revised Statutes, Title 30-A, section 3010, subsection 5-C, paragraph B, an automatic renewal provision in a franchise agreement in effect between a municipality and a cable system operator on the effective date of this Act remains in effect if the renewal date is less than 36 months after the effective date of this Act.
