1 3. Section 5 clarifies the application of the fuel gas detector law passed in 2021 to
2 require a fuel gas detector in rooms containing an appliance that combusts propane, natural
3 gas or any liquified petroleum gas. Although the change is consistent with the intent of
4 Public Law 2021, chapter 194, this is a substantive change as existing law applies to rooms
5 containing an appliance that is fueled by propane, natural gas or any liquified petroleum
6 gas. Section 5 also incorporates application dates that were included in the unallocated
7 section of Public Law 2021, chapter 194 into the statute, applying to business occupancies,
8 mercantile occupancies and assembly occupancies. This is a technical correction to the
9 statutes.
