SUMMARY

2 The purpose of this bill is to ensure that the site location of development law subjects
3 to review those projects that are truly of state or regional significance. It requires the
4 application of the law to residential subdivisions only if they contain at least 100 dwelling
5 units. It increases the threshold for review by modifying the definition of "structure" to
6 include at least 5 nonvegetated acres, increased from 3 acres. It exempts solar energy
7 projects generating less than 10 megawatts from review, even if the project covers more
8 than 20 acres.
