Amend the bill by striking out everything after the title and before the summary and inserting the following:

‘

Sec. 1. 35-A MRSA §10109, sub-§3-A is enacted to read:

3-A. Payments. The trust shall transfer to the commission \$2,000,000 per year during fiscal years 2016-17, 2017-18 and 2018-19 to be used by the commission for disbursements to affected customers. Affected customers who use the disbursement toward an efficiency measure approved by the trust in the fiscal year in which it is received must receive \$1 of assistance from the trust for every \$3 that is applied by the affected customer toward the cost of the approved efficiency measure as long as the total of assistance from the trust and the disbursement allocated by the commission under this subsection for that customer for that fiscal year does not exceed 65% of the total measure cost.

For the purposes of this subsection, "affected customer" means a customer who is not primarily in the business of selling electricity, is receiving service at a transmission or subtransmission voltage level as defined in section 10110, subsection 6 within the electrical utility transmission system administered by an independent system operator of the New England bulk power system or a successor organization and is an energy-intensive manufacturer, as defined in reports prepared by the U.S. Energy Information Administration. The commission may also determine that a manufacturer not defined as an energy-intensive manufacturer in reports prepared by the U.S. Energy Information Administration is an affected customer if that manufacturer meets the other requirements of the definition under this subsection.

A. No later than November 1st of each applicable fiscal year, the commission shall direct funds totaling \$2,000,000 per year during fiscal years 2016-17, 2017-18 and 2018-19 to be disbursed for the benefit of affected customers in proportion to their retail purchase of electricity as measured in kilowatt-hours for the prior calendar year.

B. During fiscal years 2016-17, 2017-18 and 2018-19, an affected customer who receives a disbursement under this subsection is not eligible to receive financial or other assistance from the trust fund established in this section except as allowed under this subsection. This ineligibility does not apply to any trust program opportunity notices issued before July 1, 2016.

C. The commission shall include in its annual report pursuant to section 120, subsection 7 to the joint standing committee of the Legislature having jurisdiction over public utilities matters a description of the commission's activities in carrying out the requirements of this subsection, a list of affected customers receiving disbursements, a list of those who elected to use the disbursements toward efficiency measures and the results of the activities under this subsection.

Sec. 2. 35-A MRSA §10109, sub-§4, as amended by PL 2013, c. 369, Pt. A, §§14 to 17, is further amended to read:

4. Expenditures; projects. ~~The~~Except for transfers required under subsection 3-A and other costs authorized in accordance with this chapter, funds in the trust fund must be expended in accordance with this subsection.

~~A. During fiscal years 2013-14, 2014-15 and 2015-16, not less than 50% of the trust~~The trust shall allocate 50% of the funds for residential programs and 50% for commercial and industrial programs. Trust funds received during those years must be allocated for measures, investments, loans, technical assistance and arrangements that reduce electricity consumption, increase energy efficiency or reduce greenhouse gas emissions and lower energy costs at commercial or industrial facilities; and 35% of the funds received by the trust fund during those years must be used for investment in measures that lower residential heating energy demand and reduce greenhouse gas emissions. The measures that lower residential heating demand must be fuel-neutral and may include, but are not limited to, energy efficiency improvements to residential buildings and upgrades to efficient heating systems that will reduce residential energy costs and greenhouse gas emissions, as determined by the board. The trust shall transfer to the commission 15% of funds received by the trust fund during fiscal years 2013-14, 2014-15 and 2015-16, which the commission shall direct transmission and distribution utilities to disburse to ratepayers in a manner that provides maximum benefit to the Maine economyensure that measures to reduce the cost of residential heating are available for low-income households as defined by the trust. When promoting electricity cost and consumption reduction, the trust may consider measures at commercial and industrial facilities that also lower peak capacity demand. Subject to the apportionment pursuant to this subsection, the trust shall fund conservation programs that give priority to measures with the highest benefit-to-cost ratio, as long as cost-effective collateral efficiency opportunities are not lost, and that:

- (1) Reliably reduce greenhouse gas production and heating energy costs by fossil fuel combustion in the State at the lowest cost in funds from the trust fund per unit of emissions; or
- (2) Reliably ~~reduce the consumption of electricity~~increase the efficiency with which energy in the State is consumed at the lowest cost in funds from the trust fund per ~~kilowatt-hour~~unit of energy saved.

B. Expenditures from the trust fund relating to conservation of electricity and mitigation or reduction of greenhouse gases must be made predominantly on the basis of a competitive bid process for long-term contracts, subject to rules adopted by the board under section 10105. Rules adopted by the board to implement the competitive bid process under this paragraph may not include an avoided cost methodology for compensating successful bidders. Bidders may propose contracts designed to produce greenhouse gas savings or electricity conservation savings, or both, on a unit cost basis. Contracts must be commercially reasonable and may require liquidated damages to ensure performance. Contracts must provide sufficient certainty of payment to enable commercial financing of the conservation measure purchased and its installation.

C. The board may target bid competitions in areas or to participants as they consider necessary, as long as the requirements of paragraph A are satisfied.

D. Community-based renewable energy projects, as defined in section 3602, subsection 1, may apply for funding from the trust to the extent they are eligible under paragraph A.

E. The size of a project funded by the trust fund is not limited as long as funds are awarded to maximize energy efficiency and support greenhouse gas reductions and to fully implement the triennial plan.

F. No more than \$800,000 of trust fund receipts in any one year may be used for the costs of administering the trust fund pursuant to this section. The limit on administrative costs established in this paragraph does not apply to the following costs that may be funded by the trust fund:

(1) Costs of the Department of Environmental Protection for participating in the regional organization as defined in Title 38, section 580-A, subsection 20 and for administering the allowance auction under Title 38, chapter 3-B; and

(2) Costs of the Attorney General for activities pertaining to the tracking and monitoring of allowance trading activity and managing and evaluating the trust's funding of conservation programs.

G. In order to minimize administrative costs and maximize program participation and effectiveness, the trustees shall, to the greatest extent feasible, coordinate the delivery of and make complementary the energy efficiency programs under this section and other programs under this chapter.

H. The trust shall consider delivery of efficiency programs by means of contracts with service providers that participate in competitive bid processes for reducing energy consumption within individual market segments or for particular end uses.

I. A trade association aggregator is eligible to participate in competitive bid processes under this subsection.

J. Trust fund receipts must, upon request by the Department of Environmental Protection, fund research approved by the Department of Environmental Protection in an amount of up to \$100,000 per year to develop new categories for carbon dioxide emissions offset projects, as defined in Title 38, section 580-A, subsection 6, that are located in the State. Expenditures on research pursuant to this paragraph are not considered administrative costs under paragraph F, subparagraph (1).

Sec. 3. Initial disbursement proceeding. The Public Utilities Commission shall conduct an expedited proceeding to determine the initial allocation of disbursements to each affected customer, as defined in the Maine Revised Statutes, Title 35-A, section 10109, subsection 3-A, allowed under that subsection. The commission must direct the initial distribution of funds to the benefit of such customers no later than November 1, 2016.'

SUMMARY

This amendment is the minority report and it strikes and replaces the bill. This amendment provides that \$2,000,000 of the Regional Greenhouse Gas Initiative Trust Fund revenue is to be returned to certain affected customers in the form of an annual disbursement during fiscal years 2016-17, 2017-18 and 2018-19. The amendment requires that the Public Utilities Commission determine the allocation of disbursements based on an affected customer's proportion of the customer's retail purchase of electricity as measured in kilowatt-hours for the prior calendar year. This amendment defines "affected customer." Affected customers that elect to use the disbursement toward an efficiency measure approved by the Efficiency Maine Trust would receive \$1 of assistance from the trust for every \$3 that is applied toward the measure by the affected customer as long as the total of assistance from the trust and the disbursement allocated by the commission does not exceed 65% of the total cost of the measure. This amendment also specifies that, other than the \$1 for every \$3 invested assistance, during the fiscal years in which the disbursements are allotted an affected customer is not eligible to receive financial or other assistance from the trust fund, except in relation to program opportunities noticed prior to July 1, 2016. This amendment requires that the commission include in the commission's annual report a description of its activities in relation to the disbursement process, a list of affected customers receiving disbursements and those affected customers who elect to use the disbursement toward efficiency measures and the results of the program.

This amendment requires that any revenue remaining after providing disbursements and accounting for other costs authorized be allocated in a proportional share to residential programs and commercial and industrial programs. This amendment adds that the remaining money be allocated to measures that also increase energy efficiency and that measures to reduce the cost of residential heating are available to low-income households. It also allows the trust to consider measures at commercial and industrial facilities that lower peak capacity demand when promoting electricity savings.
