LR 1065(04)

Resolve, to Create a 21st-Century Electric Grid

Fiscal Note for Bill as Engrossed with:

C "A" (H-369)

Committee: Energy, Utilities and Technology

Fiscal Note

Potential current biennium cost increase - Federal Expenditures Fund
Potential current biennium cost increase - Other Special Revenue Funds

Fiscal Detail and Notes

This bill directs the Governor's Energy Office (GEO) to hire a third-party consultant to conduct a two-part study related to a distribution system operator (DSO) to oversee integrated system planning for all electric grids. The initial portion of the study is to determine if a DSO could achieve certain objectives. If yes, the second part of the study would be to design a proposal for implementation. The GEO is required to obtain any available federal funding first for the cost of the consulting services, but allows the GEO to request up to \$300,000 from the Public Utilities Commission Reimbursement Fund if no federal funding is secured.
