Net Cost (Savings)				
General Fund	\$5,000,000	\$0	\$0	\$0
Appropriations/Allocations				
General Fund	\$5,000,000	\$0	\$0	\$0

Fiscal Detail and Notes

This bill requires the Department of Environmental Protection (DEP) to design and implement a take-back and disposal program by July 1, 2027, for firefighting and fire-suppressing foam located in the state that contains perfluoroalkyl and polyfluoroalkyl substances. The DEP has indicated it will use contracted services to complete these requirements. The DEP would require a one-time General Fund appropriation of \$5,000,000 in fiscal year 2025-26 for the estimated contracted services cost. This estimate assumes that roughly 50,000 gallons of foam meeting these requirements are present in the state and that disposal of this foam will cost \$100 per gallon. The appropriation includes an allowance that any remaining unused balance of the appropriated funds at the end of fiscal year 2025-26 must be carried forward and made available for the same purpose in fiscal year 2026-27.

Any additional costs to the Department of Public Safety to consult with the DEP are expected to be minor and can be absorbed within existing budgeted resources.
