28 **SUMMARY**

29 This bill authorizes a patient who is terminally ill and the patient's physician or the
30 medical director of the patient's hospice care provider to sign companion documents that
31 will guide the provision of health care to the patient and the provision of care at the end
32 of life. The companion documents establish the choices and directives of the patient and
33 the responsibilities of the physician or medical director. This bill shields physicians and
34 medical directors from liability or disciplinary sanctions so that the physicians and
35 medical directors may provide care in conformance with patients' choices and directives.
