SUMMARY

2 This bill establishes a model for adult day health care programs to serve Maine's
3 veterans and eligible family members. The model is based on United States Department
4 of Veterans Affairs program requirements and criteria, which promote home health care
5 and community-based outpatient care. This model is intended to reduce both short-term
6 and long-term costs of such care by utilizing community-based outpatient care options
7 and combining federal and state funding while providing a wider range of medical care
8 services, oversight and assistance with daily living for Maine's veterans and eligible
9 family members. The initial placement of a facility is intended to be in Lewiston, which
10 is an underserved area that is accessible to a significant population of eligible participants
11 and allows the facility to be colocated at existing outreach facilities for veterans.
