## 8 SUMMARY

9 This amendment makes the following changes to the bill.

10 1. It adds a definition of "in person" as it relates to a visit between an optometrist and  
11 a patient.

12 2. It provides that an optometrist-patient relationship begins when there has been an in-  
13 person encounter between the optometrist and the patient, unless the standard of care  
14 requires that a patient be seen without an in-person encounter, such as in an emergent  
15 situation.

16 3. It changes the definition of "therapeutic pharmaceutical" to include a pharmaceutical  
17 agent used to diagnose ocular conditions or diseases.

18 4. It establishes that minimum standards for an eye examination include a physical  
19 examination of each eye in an in-person clinical setting and, if a refraction is performed,  
20 the performance of an objective and subjective refraction when practicable.

21 5. It provides that the State Board of Optometry may investigate complaints against  
22 any person relating to actions or activities involving a kiosk or telehealth and makes other  
23 changes to the authority of the board to resolve complaints and impose discipline.

24 6. It clarifies the timing of when an optometrist who is closing a practice is required to  
25 create and maintain a written directive identifying the optometrist who is willing to assume  
26 responsibility for the practice, to maintain continuity of treatment and to transfer medical  
27 information.

28 7. It makes technical changes to cross-references in the bill and removes unnecessary  
29 language.
