1 SUMMARY

This amendment is the majority report of the committee. The amendment replaces the bill. The amendment requires the Public Utilities Commission to consider additional requirements before approving a reorganization involving a telephone utility with gross annual state revenues greater than \$50,000,000. The commission may approve the reorganization only when it is satisfied that the proposal will advance the economic development and information access goals of the State; that the reorganization does not result in changes to the location and the accessibility of the telephone utility's management and to employment levels in a manner that would adversely affect safety, reliability or quality of service; and that the reorganization provides an affirmative benefit to the public. The amendment also removes the requirement that the Public Utilities Commission rule upon a request for the reorganization of a large telephone utility within 180 days.
