

127th MAINE LEGISLATURE

FIRST REGULAR SESSION-2015

Legislative Document

No. 802

H.P. 551

House of Representatives, March 10, 2015

An Act To Allow the Breach or Removal of Beaver Dams That Obstruct Passage of Anadromous or Migratory Fish

Reference to the Committee on Inland Fisheries and Wildlife suggested and ordered printed.

R(+ B. Hunt

ROBERT B. HUNT Clerk

Presented by Representative TUCKER of Brunswick. Cosponsored by Senator BAKER of Sagadahoc and Representative: PIERCE of Dresden.

1 Be it enacted by the People of the State of Maine as follows:

2 Sec. 1. 12 MRSA §12760, as amended by PL 2011, c. 612, §1, is further amended 3 to read:

- 4
- 5

§12760. Fishways in dams and other artificial obstructions and in beaver dams

1. Commissioners' authority. In order to conserve, develop or restore anadromous or migratory fish resources, the commissioner and the Commissioner of Marine 6 7 Resources jointly may require within inland waters frequented by alewives, shad, salmon, sturgeon or other anadromous or migratory fish species a fishway to be erected, 8 maintained, repaired or altered by the owners, lessors or other persons in control of any 9 dam or other artificial obstruction within inland waters frequented by alewives, shad, 10 salmon, sturgeon or other anadromous or migratory fish species or of property on which a 11 beaver dam exists or by which a beaver dam may be accessed or may order such persons 12 to remove a beaver dam. 13

14 The commissioners may not require or authorize a fishway or fish bypass structure at a dam on the outlet of Sebec Lake in the Town of Sebec or at a dam on the Sebec River in 15 the Town of Milo or at a dam on the outlet of Schoodic Lake in Lake View Plantation or 16 at a dam on the outlet of Seboeis Lake in Township 4, Range 9 NWP that would allow 17 the upstream passage of an invasive fish species known to be present downstream in the 18 Piscataquis River or Penobscot River drainage. For the purposes of this section, "invasive 19 fish species" means those invasive fish species identified in the action plan for managing 20 invasive aquatic species developed pursuant to Title 38, section 1872. 21

22 2. Examination of dams. The commissioner and the Commissioner of Marine Resources shall periodically examine all dams and other artificial obstructions to fish 23 passage within the inland waters and may examine beaver dams in order to determine 24 whether fishways are necessary, sufficient or suitable for the passage of anadromous or 25 26 migratory fish.

27 3. Monitoring program. The commissioner and the Commissioner of Marine Resources shall establish a program to ensure fishways are functioning properly and 28 29 remain sufficient or suitable for the passage of anadromous or migratory fish. The commissioners have sole authority to take corrective action at fishways as prescribed 30 31 under this section.

32 4. Initiation of fishway proceedings. The commissioner and the Commissioner of Marine Resources shall initiate proceedings to consider construction, repair or alteration 33 of fishways in existing dams or other artificial obstructions or beaver dams or to consider 34 35 the removal of a beaver dam whenever the commissioners determine that one or more of the following conditions may exist: 36

37 A. Fish passage at the dam, beaver dam or obstruction in issue, whether alone or in conjunction with fish passage at other upriver barriers, will improve access to 38 39 sufficient and suitable habitat anywhere in the watershed to support a substantial 40 commercial or recreational fishery for one or more species of anadromous or migratory fish; or 41

1 B. Fish passage at the dam, beaver dam or obstruction in issue is necessary to protect 2 or enhance rare, threatened or endangered fish species. 3 5. Adjudicatory proceedings. A beaver dam removal or fishway proceeding must 4 conform to the following requirements. 5 A. A beaver dam removal or fishway proceeding must be an adjudicatory proceeding under Title 5, chapter 375, subchapter 4, but a hearing is not required unless 6 requested in accordance with paragraph B. Notice of the proceeding must be given in 7 8 accordance with Title 5, section 9052 and the following requirements: 9 (1) Personal notice must be given to the dam owner, lessee or other person in control of the dam or artificial obstruction or of property on which a beaver dam 10 exists or by which a beaver dam may be accessed, informing that person that a 11 proceeding has been undertaken and informing that person of that person's right 12 to request a hearing; and 13 (2) Notice to the public, in newspapers of general circulation in the areas 14 affected, must be given notifying the public of the initiation of the proceedings 15 and of the public's opportunity to request a hearing. 16 17 B. If any interested person requests a public hearing, the commissioner and the Commissioner of Marine Resources shall, within 30 days, either notify the petitioners 18 in writing of the commissioners' denial, stating the reasons for the denial, or schedule 19 a public hearing. The commissioners shall hold a public hearing whenever: 20 (1) The commissioners are petitioned by 50 or more residents of the State; or 21 22 The owner, lessee or other person in control of the dam or artificial (2)obstruction or of property on which a beaver dam exists or by which a beaver 23 24 dam may be accessed requests a hearing. C. The commissioner and the Commissioner of Marine Resources shall accept 25 testimony from the owner, lessee or other person in control of the dam or artificial 26 obstruction or of property on which a beaver dam exists or by which a beaver dam 27 28 may be accessed on alternate fishway designs to those proposed by the 29 commissioners for that dam or, artificial obstruction or beaver dam or on alternatives 30 to the removal of a beaver dam. 31 6. Decision. In the event that the commissioner and the Commissioner of Marine 32 Resources decide that a fishway should be constructed, repaired, altered or maintained 33 pursuant to this section or that a beaver dam should be removed, the commissioners shall issue final orders with specific plans and descriptions of the fishway construction, 34 35 alteration, repair or maintenance requirements or of the removal of the beaver dam, the conditions of the use of the a fishway and the time and manner required for fishway 36 37 operation. The commissioners may issue a decision requiring the owners, lessees or other 38 persons in control of the dam or obstruction or of property on which a beaver dam exists or by which a beaver dam may be accessed to construct, repair, alter or maintain a 39 40 fishway or to remove a beaver dam. Such a decision must be supported by a finding 41 based on evidence submitted to the commissioners that either of the following conditions 42 exist:

A. One or more species of anadromous or migratory fish can be restored in substantial numbers to the watershed <u>by the removal of a beaver dam or</u> by construction, alteration, repair or maintenance of a fishway and habitat anywhere in the watershed above the dam<u>, beaver dam</u> or obstruction is sufficient and suitable to support a substantial commercial or recreational fishery for one or more species of anadromous or migratory fish; or

B. The construction, alteration, repair or maintenance of a fishway or the removal of
 <u>a beaver dam</u> is necessary to protect or enhance rare, threatened or endangered fish
 species.

10 In With regard to a dam or other artificial obstruction, in the event that the commissioners 11 decide that a fishway should not be constructed, the commissioners shall specify in that 12 decision a period not to exceed 5 years subsequent to that decision during which a 13 fishway may not be required to be constructed.

7. Compliance. The owner, lessee or other person in control of a dam or other
 artificial obstruction or of property on which a beaver dam exists or by which a beaver
 dam may be accessed is jointly and severally liable for the costs of fishway design,
 construction, repair, alteration or maintenance, or of the removal of a beaver dam and for
 full compliance with a decision issued pursuant to subsection 6.

19 A. If the owner, lessee or other person in control of a dam or other artificial obstruction or of property on which a beaver dam exists or by which a beaver dam 20 may be accessed refuses to comply or does not fully comply with the decision issued 21 22 pursuant to subsection 6, the commissioner and the Commissioner of Marine Resources shall initiate a civil action to enjoin the owner, lessee or person in control 23 of the dam or of property on which a beaver dam exists or by which a beaver dam 24 may be accessed to comply fully with the commissioners' order or to restrain the 25 26 violation of an order. In the proceeding, the court may not review the legality of the 27 commissioners' order, except when the owner, lessee or person in control of the dam or artificial obstruction or of property on which a beaver dam exists or by which a 28 29 beaver dam may be accessed has brought a timely petition for judicial review 30 pursuant to Title 5, chapter 375, subchapter 7.

31 B. The court may render judgment against and order the sale of the dam or other 32 artificial obstruction, the land on which it stands and a right-of-way to the dam or 33 artificial obstruction or of the property on which a beaver dam exists or by which a beaver dam may be accessed, in order to secure the costs of fishway construction, 34 35 repair, alteration or maintenance or of removal of the beaver dam, the costs of the court-ordered sale and the costs incurred by the department for any fishway design. 36 The purchaser of the dam or other obstruction or of the property on which a beaver 37 38 dam exists or by which a beaver dam may be accessed is subject to the decision issued pursuant to subsection 6. 39

8. Privileged entry. The commissioner and the Commissioner of Marine Resources,
 the commissioners' agents or subcontractors may enter upon any private land in order to
 examine, at least annually, fishways in dams or other artificial obstructions and beaver
 dams and dams and beaver dams as provided in subsection 2. The commissioners shall
 notify the landowner owner, lessee or other person in control of the dam or of the

1 property on which a beaver dam exists or by which a beaver dam may be accessed when 2 the examination will take place and the time required to complete the examination. The 3 commissioners shall make every effort to preserve private land and shall restore 4 surrounding lands to the grade and condition existing prior to entry, if economically 5 feasible.

9. Certain lakes, rivers and streams; fishways prohibited. Notwithstanding any
other provision of law to the contrary, the owners, lessors or other persons in control of a
dam on the outlet of Sebec Lake in the Town of Sebec, of Schoodic Lake in Lake View
Plantation or of Seboeis Lake or a dam on the Sebec River in the Town of Milo may not
construct or authorize the construction of a fishway or fish bypass structure that would
allow the upstream passage of an invasive fish species known to be present downstream
in the Piscataquis River or Penobscot River drainage.

- 13A. A person who violates this subsection commits a civil violation for which a fine14of not less than \$500 or more than \$1,000 may be adjudged.
- B. A person who violates this subsection after having been adjudicated as having
 committed 3 or more civil violations under this Part within the previous 5-year period
 commits a Class E crime.
- 18 SUMMARY

19 This bill gives the Commissioner of Inland Fisheries and Wildlife and the 20 Commissioner of Marine Resources explicit authority to require fishways to be installed 21 and maintained through beaver dams by the owners, lessees or other persons in control of 22 the property on which a beaver dam exists or by which a beaver dam may be accessed or 23 to require a beaver dam to be removed in order to conserve, develop or restore 24 anadromous or migratory fish resources.
