I urge the Maine Legislature to approve this funding bill to ensure that our neighbors can survive this year's Maine Winter.

It is true that heating costs have skyrocketed and - especially during this week of plummeting temperatures - I fear for my neighbors. And this is only December!

This bill will provide help for 92% of Mainers! What on Earth is the hold up?!

These moneys are being drawn from surplus funds, and I cannot imagine a more worthy cause.

Thank you for your consideration.
