I am against
I oppose the budget appropriation from HCBS

My name is Jessie Greenbaum. I live in Mount Desert, Maine. I am disappointed to learn that 35 million dollars would be taken out of HCBS. HCBS is still not serving everyone who qualifies for services with them. The staff who work with the people who have Section 21, 29, 18, and 20, deserve to make a living wage and the taking money away from HCBS is one more road block. WE need to continue to get people off the waitlists and to pay the staff, well enough that they want to do these jobs.

I am related to a person with intellectual disabilities, and he is benefiting immensely from having a DSP. He is finally living independently. I have to say how much I respect the staff person who works with him. I wish that this staff person was paid well. I know we need more people like him and to retain them.

If there is a different source for the heating money. That is where it should come from. If not we need a better way to evaluate who needs it. It does not make sense to me to give it to everyone. Let's keep people employed and off of waitlists. And find a way to know who needs heating assistance.
