

Dr. Thomas Johnson

LD 164

My Name is Dr. Thomas Johnson and I live on Sabbathday Lake in New Gloucester and have lived here for over 50 years. My wife and I and several neighbors started the Sabbathday Lake Association in the mid 1970's. Our first priority was to establish a water quality research committee. We were fortunate in having as a neighbor . Dr Russel, a Boston College chemistry professor who served as the first chairperson

. Since that time members of the association have been very active in doing what we could to maintain high quality lake water

The effects of warming waters, longer growing seasons, longer rain events and increased development pressure are putting Maine lakes at greater risk with every passing day. Funding for lake protection projects are desperately needed to safeguard lake health in the coming decades.

Please invest in the healthy future of Maine's lakes today to protect local economies, outdoor tourism, sporting and recreation businesses, wildlife habitat and much more for all who use lakes in the future.

Dr. Thomas Johnson, NCSP,CPQ,IPC
National Register Health Services Psychologist
& Maine Licensed Psychologist
