This bill is a no brainer there is virtually nothing you do today that doesn't need an Id . You even need a photo id to attend a school dance, I would venture to say that very few people don't have a photo ID but they can get one at no charge at their local dmv. You can expect some to say that this will be a detriment to voting that is so far from the truth it is laughable. Today all I have to do is go to the pole and give your name and address and I will be allowed to vote, and when you go to vote you will be told that you already voted, with a photo ID you will not run into this problem. It is a positive step in securing election security. I ask you all to vote to yes on this bill and it should be allowed to move forward with should pass.

Thank you
