LD 34

I support LD 34 An Act to Require a Person to Show Photographic Identification for the Purpose of Voting

As an American, I want to restore faith in the integrity of our elections. Voter ID is one way to do this and it is not racist. It is a way to ensure that each Maine resident votes only once in each election.

Photo IDs are common. One cannot drive or fly without a photo ID yet no one complains that this is racist. According to a poll conducted on Jan. 17 by the University of Georgia's School of Public & International Affairs, the percentage of black voters who said they had a "poor" experience at the polls was zero.

Thank you for your consideration in this matter.
