LD 330

I have concerns about LD 330, which does not seem to have been written yet. It seems to be picking sides in the eviction process, which is unfair. I'd argue both parties should be offered equal representation. This can be done by keeping the current system or offer representation to both parties.

I'd remind you that evictions are usually done for good cause. I know we look to evictions as an absolute last resort. They are hard on both tenants AND property owners. Evictions usually cost property owners thousands of dollars due to legal fees, lost rent, damage to property.
