

Ld 541

Parity in taxation for medication.

I would like to support this bill as it makes common sense why it should not be passed.

A medicine is a medicine as it is often said that government is running behind what is going on in the world. This is your opportunity for Maine to correct a wrong.

Finally I would go further and exempt over the counter medication as an example aspirin back pain medication and others Just because there is no prescription attached to the purchase of these doctors often tell their patients to purchase them

Thank you andre a beausoleil sanford
