

I think the Parole board should Come back. Because everyone in the System should get a Second chance to put they life back together with they family and friends. Alot of the inmates are going to School and put they lifes back together by getting a good Job. After you have done alot of time in here for the Crime that put you in here. The inmates appreciate the Schodling and want a chance to put it to work for them on the outside in Society. It's hard in here for them to be for some many years know they will not get a chance to get out and see if they have turned there life around and live in Society like a Free Person!!! We are all people too and we know we did worry!!!
