

Colin Phillips, MD, FACC
Maine Medical Center
LD 844

As a practicing interventional cardiologist in Maine, I am interested in providing the best care for patients. This bill allows our excellent team members assist in procedures under my direction using skills that they have been trained on. It will help procedures move more efficiently and safely. As the governor of the Maine Chapter of the American College of Cardiology, I have reviewed this bill with other cardiologists in the state who are also in agreement with its merits. Thank you for your consideration.
