To Marine Resources Committee
Regarding LD 586

I am writing to state my opposition to LD 586. Very simply it has been written to destroy aquaculture in Maine. That its' purpose and intention. Maine and the USA government already does an excellent job regulating aquaculture. If anything it does almost too much. I hope the committee will recommend "ought not to pass." While I am a Belfast City Councilor who has endured 5 years of the RAS debate and understand both the technology and the intent of the legislation I am writing as an individual. Thank you for your work. Yours truly;
Michael Hurley Belfast, Maine
