

Kathleen Goodwin
Bangor
LD 906

I would like to offer my support of LD 906. I think that this would help with an early diagnosis of Lyme disease. With the knowledge of disease earlier rather than later, quicker response to treatment could help a person's recovery from the disease. I have seen the devastating effects of Lyme disease in my stepdaughter. I feel if her doctor would have had access to more diagnostic information, she would have had a quicker diagnosis, and her treatment could have started sooner.
