

Ruth Fogg
DEXTER
LD 693

I ask you to support LD 693. It is a common sense measure to mitigate the detrimental shoreline effects of powerful wake boats. I live on Lake Wassookeag, Dexter year round and already see the stress powerful motorboats have on the shoreline and water fowl, especially the loons. Loons are still on their nests till late July here and the large waves and noise add to the mothers already difficult burden of hatching and raising her chick(s). I feel that we as a species do not have the right to harm or stress other species in the name of pleasure.
