Richardson's Boat Yard
LD 693

To all members. As LD 693 is written I see it as hard to enforce with the 500 feet and 20 ft depth limits. The present 200 foot wake safety is working in our area and expanding it without taking a closer view to see if there is a problem will not solve anything. Different lakes have different problems with shore line etc. I believe that LD 379 is the right approach to look at this issue and come up with a solution that would work using both education and enforcement as the last resort.
