Lewiston
LD 51

I support LD51 to restore religious and philosophical exemptions to immunization requirements. I am unemployed and locked out of my healthcare profession because I was forced to choose between the c19 shot or lose my livelihood. Religious exemptions were denied without review and Title VII was completely ignored. Choosing medical freedom and bodily autonomy is a choice granted with adhering to the tenets of our constitution. Anything less is tyranny. Children by the age of 18 years old have a total of 79 vaccines. Now 1 of 35 children have autism. Coincidence? We need to protect our children from this scandalous agenda. Thank you!
