

John Mooskian  
South Berwick Maine  
LD 94

As a taxpayer, veteran & medical cannabis patient I use concentrates for essential high-dose treatments. I prefer the freedom to choose how to administer dosage. Increased freedom & access is my desire.

The system of the medical provider issuing certification cards works well and protects patient privacy - the government shouldn't have a list of cannabis patients. Medical providers can decide if the potential benefits of medical cannabis use outweigh the potential risks for any patient condition. The proposed language would prevent the use of cannabis for common conditions like insomnia, generalized anxiety, end-of-life symptoms, rare neurological conditions, and much more.

Physician assistants have served me (as well as naturopathic physicians) are qualified to determine if treatment with medical cannabis is indicated.

This bill will cause me & thousands of other patients to have to choose between breaking the law and risking legal consequences for a victimless crime or going without their medical treatment.
