

Cheryl Farley  
Norridgewock  
LD 51

My name is Cheri Farley. I was raised in healthcare, as my parents and grandparents owned and operated very nice nursing homes in several New England states throughout the years. At 15 years old I was trained and worked my whole summer as a Nurses Aide. Back then you weren't certified but trained under very skilled Aides. There were no disposable briefs or gloves so I literally got my hands dirty, but I was proud to help the elderly. I eventually became a Registered Nurse and worked very hard for years and years. I loved my work for the most part. At age 66 I was "let go" because I choose not to get the experimental Covid vaccine. I've always taken good care of my health and trust in my God-given immune system. I left a really sweet position for my stage of life. Could actually have worked remotely, which I often did anyway. I do hope that this mandate gets overturned, but even if it does it's already done me and my family irreparable damage. I lost my income for all this time and at my age, now 68, I would be hard pressed to find work that would be so well suited for me.

Thank you for your good fight. I'm behind you and have donated when I can.  
May God bless your efforts!
