LD 94

I want to try and convey my almost unbearable disappointment in yet another proposed bill (LD 94) which is clearly aimed at dismantling the medical program by imposing drastic restrictions. Implementation of this bill, or any version of it, would have a serious negative impact on not only the 100,000+ in/out of state patients that benefit from the program, but the State of Maine itself as it receives substantial revenue from its taxes. In all honesty, the content of these propositions shows a very clear ignorance of what has made the Maine Medical Marijuana Program amongst the top in the entire country.

As someone who owns and operates a medical processing facility, of which the well-being of my family depends on, along with the families of the people I employ. The complete removal of concentrates from the medical program sort of flabbergasts me to be quite honest. It's really just another display of complete disconnect and ignorance with an agenda. The full scope of benefits that concentrates provide, with all the various forms and vast applications, is really too great to cram into this type of forum. Banning concentrates would affect all patients, from those treating common ailments to people with more serious conditions that may require the crucial higher doses that they provide.

Not to mention all the contributing tax paying entrepreneurs like myself, that have put everything they have into the businesses that produce these concentrates.

In conclusion; Concentrates play a key role in a large majority of the medicinal products available to patients. Please vote this bill down and see it for what it is, a direct attack and very real danger to the future of our medical marijuana program.
