Portland  
LD 1101

We support LD1101. As long-time residents of Portland, ME we want to take every opportunity to reduce our carbon footprint and save our planet.

We live in a large apartment house/condo. When we remodeled our unit we also insulated our external walls. Very few others in our building have done this. We have a warmer apartment than most of our neighbors but have not received any financial benefits since heating costs are shared on a “per square foot” basis. Resale values are difficult to estimate without a measurement of the value of our insulation.

Please join us in supporting LD1101.
