

Alex Greenlaw  
Bath Cannabis Company  
LD 94

I am writing in my testimony today to stop LD 94.

It is outrageous to think that it is a good idea to ban concentrates from the medical program as many of the patients depend on having their medicine (Concentrates) available to them in this form for serious conditions.

Medical patients are protected and need to continue being protected as it is not the governments place or this person that has submitted such an atrocious bill to further this agenda and to hurt the medical patients opportunities to purchase and receive the medicine of there choosing and with PRIVACY.

This atrocious proposal bill would prevent Medical Patients from the use of Cannabis for common conditions which make no sense whatsoever. Most reasonable and intelligent people can understand that common conditions can certainly worsen and manifest other and potentially serious conditions if left untreated. So to propose and support a bill like this I cannot in good faith as it would just do a disservice to the great people in the State of Maine who rely and use this medicine that actually can help them.

As this atrocious bill proposes to prohibit Physician assistants to proscribe certifications to patients is unjust as they are fully qualified to take on a responsibility in a normal doctors office to proscribe medicine to patients, how is this any different from those practices, this bill is just filled with hypocrisy as you can clearly see this person and the proposed bill does not care about Maine and its important and great medical program. The other big issue is that this would delay patients the opportunity to receive treatment which we just can not allow to happen.

This is my testimony and I think this proposed bill is ridiculous and if anything will hurt more then just patients in the state of Maine. It would impact patients, store owners, employees, Physician assistants and so many more who are a part of this great community. The amount of trickle down effect would be massive and we cannot stand for this.

Thank you,
