LD 51

Dear Legislators,

I write to beg you to remove the onerous mandates of vaccinations/immunizations from our lives and vote to support LD51. Vaccines have severely sickened and injured not only myself, but both of my children as well. Although we supposedly have access to "medical exemptions", these are not functionally available except where injury is severe, and even then these exemptions are dictated not only by vaccine manufacturer's scanty "safety trials", but also limited to a doctor's fear of risk to their medical license should they issue one. A child must be injured and damaged before an exemption will even be considered, and only for that particular vaccine--they must still receive every other shot. Any attempt to recover losses from severe injury and/or the death of a beloved child involves taking on the lawyers of the Department of Justice; this is an agonizingly slow, not to mention cruel path for any parent to have to follow in the wake of loss of their child's health due to "public health" mandates. Pharmaceutical manufacturers are essentially free of liability and there is little oversight into their conduct.

Parents of vaccine-injured children are continuously harassed and ridiculed as per pressure put in place by the medical-industrial complex. Doctors receive little to no training in recognizing and diagnosing vaccine injury, and are recipients of hefty bonuses should children take the entire CDC Vaccination Schedule on time. Forced immunizations are devoid of compassion for the individual; they are a "one-size-fits-all" approach to pharmaceutical use that should be a personal choice. Mandates care not about bio-individuality, genetic predispositions, genetic mutations, nor a child's sensitivity as per environmental exposures, or that all of these interact to uniquely influence each child's health.

Vaccine mandates violate our rights in every way. They violate our parental rights under Common Law, so that we may not superintend the health of our children. They violate our Constitutional rights, where our liberties are removed in exchange for a promise of safety backed by dubious trials. They violate International law, specifically the Nuremberg Code and the International Covenant of Civil and Political Rights, born of the sacrifices of our forefathers in foreign wars so that we may be free of the horrors they witnessed. Mandated vaccinations violate our right to Informed Consent, where the free consent of the patient is absolutely essential in order to receive treatment. And these compulsory medications violate our civil rights; without medical freedom, we are nothing more than slaves, for if we have no control over our health, we have no control over our lives.

Peer-reviewed studies have been conducted and released show that unvaccinated children are healthier than vaccinated children. Not only do they show far lower rates of autism, ADHD, allergies, and asthma, they also fall ill far less frequently, and are not as severely ill.

Compulsory vaccinations have been the Russian Roulette of childhood health since their inception. Please free us from this repugnant, unlawful requirement by supporting LD 51.

Respectfully, Crystal Nicholas
