Please restore religious and philosophical exemptions to immunization requirements. I believe vaccines as well as any other injections you put into yours or your child's body deserves personal choice which supports the reinstatement of philosophical and religious belief exemptions. To allow a State to dictate what will be injected into your or your child's body violates ones Civil Rights. This dictate is making many want to move to other states and avoid public schooling , Maine was once was an attractive place for raising families. The WHO recently said , March 29 2023, that healthy kids and teens are low risk . The New England Journal of Medicine shared findings that supported natural immunity being superior to vaccination. This law is to reinstate religious and philosophical exemptions , which never should have been removed to begin with. The Covid vaccine was and is an experiment and violates the Nuremberg code " every human being of adult years and sound mind has a right to determine what shall be done with their own body. " We are a Christian family with a strong moral compass that always supports life .Many of the required vaccines support using fetal cells whether during development or production. To mandate vaccines that did not stop the spread or stop illness however stopped people from being able to work or participate in life is not only unethical but unconstitutional. Thank you for your consideration.
