An Act to Restore Religious and Philosophical Exemptions to Immunization  
Requirements

HP26/LD51

HP693/LD1098

HP769/LD1209

Senator Rafferty, Representative Brennan, and members of the Joint Standing  
Committee on Education and Cultural Affairs:

Greetings: I am writing in support of the above listed bills returning religious and philosophical exemptions to immunization. I understand the intent is to protect the population against many different infections and transmission of sickness. After all the miss information on covid 19 both from public but more importantly from the government, it should be left up to the individual as to the risk management of their lives and family.

We are now beginning to deal with the fall out of the results of covid 19 immunizations that have adversely affect people and altered or ended their lives. Not all government information will ever be revealed to the public for obvious reasons of the adverse effects from the shots.

We need to return to a normal and sane world of reality. We lack professionals who have worked most of their lives and been let go from their jobs because they refused the jab. There are Doctors, nurses, fire fighters, police and many others. I work in the real world where we were not affected by these requirements and are the beneficiary of having these professionals having to come here to work.

Let's bring back some sanity to the world. Please vote ought to pass on these bills and the other related bills coming to your committee at this time.

Thank you for your consideration and time.
