

Amber Patterson
Fayette
LD 410

I am against LD410. I believe that it is reverting back in time from already passed legislation. Also, there's no way to determine whether a plant is hemp or cannabis, which is a huge problem. There is no way to determine whether the smell would be coming from a hemp cigarette or a cannabis cigarette. I am both shocked and appalled at the legislation, especially seeing as senator cut way, has already brought forth very similar legislation in the past years, and it seems extremely redundant and a waste of time and taxpayer money. This is a huge violation of our privacy, and I implore you to imagine what it would be like to be told you could not smoke in your own home in your own yard in your own private property.
