As a long time member of SAG-AFTRA it is a great disappointment that film production in Maine has been ignored by the Legislature. Not only are you turning your nose up at an economic windfall (they spends LOTS of money when shooting and offer many jobs) but you are driving our young professionals in the industry away.

Though my days as a performer are largely behind me (I am a 75 year old disabled Vet) I certainly would like to see the Legislature take off the blinders and get in the race. Encourage Film Production in Maine!
