Dear members of the committee, I'm a tobacco retailer in the State and oppose this legislation. I saw what happened in Massachusetts when they banned flavored tobacco product and it doesn't seem to be working out well for them. They have pushed many sales to the black market and to neighboring States. Adults should have the ability to make their own choices. The adults that are seen in my store are finding a relief from a life long habit of smoking combustible cigarettes. Many have expressed they fear cigarettes being their only option and don't want to go back to combustibles but feel they would if tobacco vapes were the only thing available. I urge you to oppose this legislation and appreciate your consideration
