Here we go again!! This bill is absolutely anti Maine business... we operate a very strong and regulated business in the state. This bill eliminates all kinds of public safety and regulatory standards.

As a born and raised Maine person who has stayed here to operate a very heavily regulated business, I can't believe that we are even bringing this up again.

The entire thought process of any of this "proposed bill" is completely against any of the many standards in which we all operate (state/wholesale/retail)!

The thought of a "person"; regardless of actual verification of age/soberness/intent to be able to order a controlled substance and have it show up on a doorstep is certainly asking for so much trouble!...Just the thought of it is astonishing!

As a father of a teenager with every screen available...the answer is a very clear NO. Thank-you all for the consideration.
