Greetings!

I believe this bill is a bill of common sense. Gun free zones make our schools vulnerable to unstable killers. A killer wants to maximize their kill. If they have a choice between a gun free zone and the option of being killed before even firing a shot, well, common sense! I pray someday that all schools will be protected, but for today, let's set an example for the rest of the country. Let's forewarn any unstable killers that stepping into a Maine school would not be wise.

Thank you!
