Vaping has helped me as well as so many others quit smoking cigarettes. I know that you are not banning vaping, just the flavors, but the flavors are the heart and soul of the vape juice industry, what's the point of vaping if I cant vape something that I like? I cant even think about going back to a cigarette the smell alone is sickening, not everyone who is a smoker likes the taste of plain tobacco if you pass this bill the amount of revenue lost from customers will be substantial, we will not simply switch back to smoking cigarettes that's how much these products have helped us make better choices.
