Hi, my name is King and I go to school in Caribou. I see kids who are older than me but not old enough to smoke and vape use tobacco and I don't understand why it can be so easy for them. I don't want to be sick or addicted when I grow up so I avoid things like tobacco. But it seems like the older you get the harder it is to stay away from smokers.

I think it's not fair companies make things with flavors for kids. Tobacco just makes you sick, and everyone should have a fair chance to be healthy. Thank you for listening to me.
