Children have access to vape products because they do what kids do and try to obtain access to kid from asking older siblings/friends, stealing from parents, etc... no minor can legally walk into a smoke shop without getting carded nowadays so the flavors and packing on these products being appealing to kids shouldn't even be a legitimate reason for banning these products, its not going to stop kids from getting their hands on these products no different than alcohol, cannabis, or any other recreational drug. Banning these products isn't going to solve the problem you are just creating more issues among your residents vs who you decide to invest your tax dollars in. We do not want this ban!
